

U.S. DATA CENTER DIRECTORIES & MAPS

There is no single official public database containing every data center operating in the United States. Different databases include different types of facilities and therefore report different totals. For the broadest nationwide search, use **DataCenterMap.com** or **DCMap.us**. For operating and proposed projects, use **Cleanview's U.S. Data Center Tracker**. For source-cited research, use **Compute Atlas**. The U.S. Department of Energy/PNNL also publishes the **IM3 Open Source Data Center Atlas**, an open research dataset containing locations of known existing facilities.

Main nationwide directory:

DataCenterMap.com/usa/

Interactive operating + planned map:

DCMap.us

Operating + proposed projects:

Cleanview.co/data-centers/us

Source-cited research database:

Compute-Atlas.com

Government/research dataset:

[DOE/PNNL IM3 Open Source Data Center Atlas](https://DOE/PNNL-IM3-Open-Source-Data-Center-Atlas)

AY USE A VPN AND PRIVATE BROWSER FIRST LOL see cyber guide 04 for run down on that

[right here : cyber guide 4 internet privacy](#)
